RUNTIME: one codebase, API and durable worker processes
Steam APIs
Catalog / reviews / news
Connector + worker
Rate budget / checkpoints
Source archive
Sanitized, versioned JSON
Normalize + parse
Review spans / patch claims
enqueue
Streamlit
Game / patch / evidence
FastAPI
Jobs + cached report reads
Postgres + pgvector
Evidence + report snapshots
Inference pipeline
Retrieve / link / polarity / status
load
DVC snapshots
Offline training inputs
Training + evaluation
MLflow runs and registry
Release manifest
Pinned model bundle
OFFLINE LIFECYCLE: snapshots are cut from the source archive; serving never trains models
